Gethsemane Greenville - PrayerCenter Prayer Requests

Praise

Request	Requester
On 1/4/2010 Fannie Mae Downs was diagnosed with breast cancer and noone is sure how	An anonymous requester
long she probably had it, because she never complained about it. In May of 2010 after she had	
turned 102 years old she had surgery on her leg after she fell. Fannie Mae's doctor was	
impressed with how smooth her bone was and how he was able to screw into her bone. Many	
women younger than her have brittle bones and make surgery difficult. Fannie Mae refused to	
use a cane as long as she lived and continued to come to worship and Bible Study until she	
was homebound. But even from her home she listened to the sermons each week that were	
recorded.
